## Cuoio rigenerato / *Regenerated leather*

E' un materiale ecologico composto minimo dal 60% di fibre di cuoio (sfridi di pellame) ottenuto con un processo industriale. Il cuoio viene finemente tritato e miscchiato a gomma naturale fino ad ottenere un composto omogeneo che viene lavorato in fogli di diverso spessore. Il prodotto finale al tatto e alla vista è simile alla vera pelle.

*This is an ecological material composed of minimum 60% of leather fibers obtained by an industrial process. Leather is finely ground and mixed with natural rubber to obtain a homogeneous compound that is processed in sheets of different thickness. The final product is similar to the touch and to the eye to real leather.*
